Maximum Comfort Hand-in-Hand With Uncompromising Technology

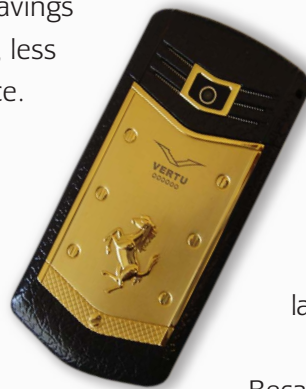

Our fleet consists of extremely comfortable private jets, designed to use state-of-the-art technology.

Our aircraft fly higher than most, which translates into time savings due to more suitable winds, less air traffic, and less turbulence. The maximum flight range of a Panaviatic jet is over 4000 km - enough for a direct flight to any destination within Europe.

The interior of our jets features a modern design, and provides superior comfort thanks to a cabin spacious enough for a standing adult, a wide aisle, and generous head and shoulder room for

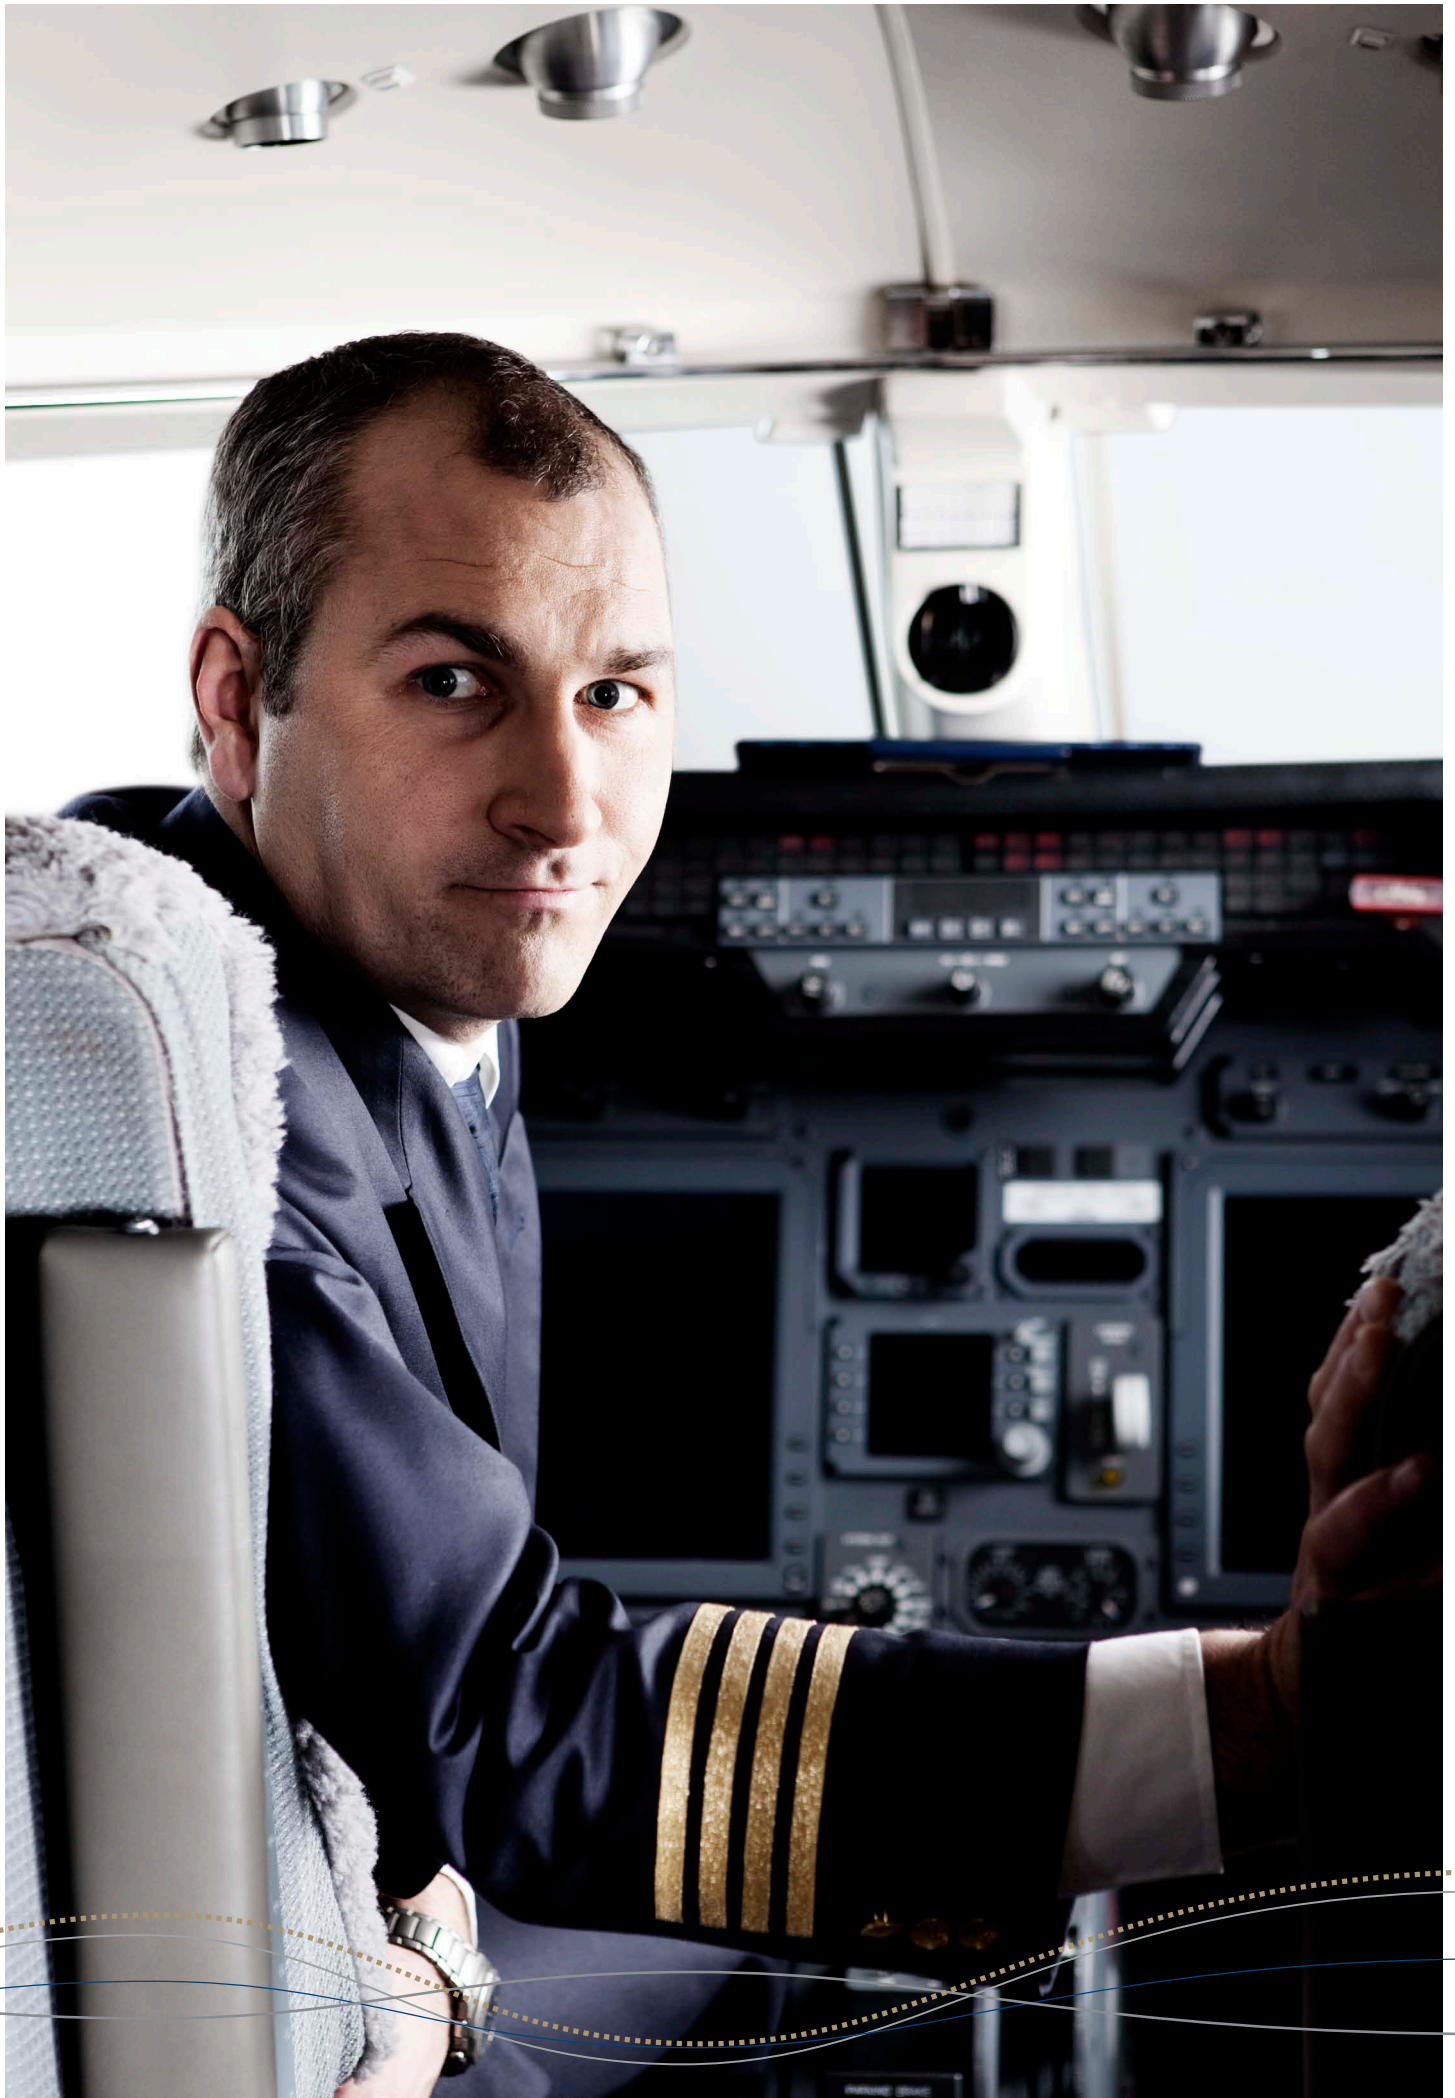

seated passengers. These outstanding aircraft not only provide travellers with more space, but also deliver superior cabin functionality. The cabin features

LED lighting and an easy-to-use entertainment system with LCD touch-screen control units, as well as a high-end multimedia system with XM satellite radio, DVD and MP3 players, and laptop connectivity.

Because of the extended climbing velocity and operating altitude that these jets provide, and because of their stunning design, they are often called VIP-class rockets.

Panaviatic – Absolute Professionalism

In the world of private aviation, every person is the best at what they do. At Panaviatic we provide you with a truly efficient crew, one that functions as a cohesive whole. Our employees are completely dedicated to their work, and know how to always stay one step ahead of our clients' expectations.

Maintaining quality is a continuous process. Panaviatic devotes a great deal of effort to the thorough training of its personnel. All our flight crews undergo annual training in the United States, at the Bombardier flight simulator facility. We believe in the significance of

up-to-date training and apply it consistently, assuring Panaviatic's clients that their jet is always in the best of hands.

The Panaviatic experience is not just about the best service and uncompromising safety and security;

equally important is the trustworthiness and discretion of our crews

in their interactions with both our clients and our partners.

By systematically implementing these simple principles, Panaviatic is able to ensure the best VIP service both in the sky and on the ground.
